

CFI Forum: Conducting an IPC

Loss of Control in IMC is a leading cause of accidents and too often it is an instrument pilot that falls victim to this conundrum. Proper proficiency training and checking from a knowledgeable CFI is one way to mitigate this causal factor. Learn how best to prepare and conduct this very important and often neglected flight training event. This seminar is so important that it is open to all airmen and is not limited to Certified Flight Instructors. Seating is limited. Click on the link below and Register Today.

Directions: See Google Map Link attached. Follow Control Tower Drive to AviatMall hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
